Company Background

What began in 1978 as a garage-based business at the home of HCL® owner Gary Sharpe now encompasses five well-equipped facilities in central Ohio and reaches customers around the globe. Employment has grown too, with more than 300 employees now dedicated to the company's mission of providing unmatched customer service. Sharpe discovered early in his career the need for healthcare products in sizes, quantities, and materials not readily available and was determined to deliver. And has he ever. Today HCL's inventory includes more than 9,000 different products all designed to provide "Special Answers to Special Problems." Most of these items are maintained locally in more than 320,000 square feet of warehouse space and meet the supply needs of hospitals, pharmacies, chain drug stores, pharmaceuticals, and many other facets of healthcare.

Product Overview

■ EZ Grid™ Unit Dose Packaging System

Achieve precise label-to-blister alignment every time you repackage tablets or batch process prescriptions with our exclusive EZ Grid unit dose packaging system. Sheets for blisters and labels are available in 5 x 5 grids so there are no unused pieces and no waste to discard. The system is designed around a sturdy aluminum frame with two locator pins. It allows you to choose your inserts (pick from round, slot, and square; all are interchangeable), then choose the matching blister and label combination that meets your Class A or Class B package requirements. Select only the pieces that apply to your process. Blister and label combinations meet USP <671> so you can be confident in the quality of your unit dose package from start to finish.

HCL® by Design

Our manufacturing division encompasses 120,000 square feet of space dedicated to making exactly what you need. Because production capabilities are virtually unlimited, we can help healthcare professionals solve problems and improve performance, accountability, and reliability in ways previously unthinkable.
