Company Background

Innova Medical Group, Inc. delivers better global health outcomes with its deep expertise in testing and unique offerings in diagnostic medical devices and services that help tackle some of the world's most challenging healthcare problems. Innova specializes in innovative screening, testing, and diagnostics for cancer, heart disease, arterial calcification, stroke, and virus detection focused on infectious diseases. In response to the global pandemic, Innova developed an end-to-end ecosystem of rapid diagnostic and screening tests, along with digital reporting and tracing applications to help organizations manage the COVID-19 crisis. In 2020, Innova delivered more than 220+ million COVID-19 test kits to over 20 countries around the globe, including the United Kingdom, Hungary, Singapore, United Arab Emirates, and Myanmar.

Product Overview

The Advin COVID-19 Antigen Test @Home is a lateral flow immunoassay device intended for the qualitative detection of nucleocapsid protein antigens from SARS-CoV-2.

- Simple, Quick, Accurate
- Rapid Result in 10 Minutes

This test is authorized for non-prescription home use with self-collected anterior nasal (nares) swab samples from individuals aged 14 years or older or with adult-collected anterior nasal (nares) samples from individuals aged 2 years or older. This test is authorized for individuals with symptoms of COVID-19 within the first seven days of symptom onset when tested at least twice over three days with at least 48 hours between tests, and for individuals without symptoms or other epidemiological reasons to suspect COVID-19, when tested at least three times over five days with at least 48 hours between tests.
