Company Background

As a trusted and proven pharmacy software provider, SuiteRx addresses the needs and challenges present in the pharmacy market through an innovative work flow management system. We offer operational solutions and medication safety improvements to develop work flow efficiency and safety throughout your pharmacy.

The scalability and flexibility of SuiteRx's Intelligent Pharmacy Software (IPS) enables single and multi-location pharmacies to improve accuracy, greatly reduce costs, expedite billing, streamline prescription processing, and maximize return on investment. IPS was designed through the collaborative efforts of experienced pharmacists with over 50 years of experience in the industry. Every SuiteRx customer benefits from our ultimate and fully integrated pharmacy management system. We take pride in serving our clients with superior customer service, reliable installation, excellent training, and quality support.

Product Overview

IPS improves work flow efficiency, increases staff productivity, optimizes patient safety and streamlines your retail and long-term care operations in a single database solution. Benefits and features include, but are not limited to, the following: work flow management, Rx Web Portal, document management, IVR, delivery management, compounding, inventory management, mobile applications, and custom reporting. We help pharmacies work smarter and become more agile, which in turn enables them to be more competitive and to improve customer satisfaction. We encourage input from our customers and customize our software to help them reduce costs, improve service, and increase efficiency and productivity.

IPS offers the convenience of cycle fill work flow, which allows synchronization of medications in both retail and long-term

care pharmacies. Our Rx Web Portal enhances communication between facilities, prescribers, and family members. Facilities can request refills and print MARs online, view patient profiles, check drug interactions, print drug monographs, and administer medications electronically. Our document management system provides instant access to all documents including prescriptions, refill approvals, prior authorization forms, emails, and signed patient forms.
