RxMedic
count less...do more

Company Background

Based in Wake Forest, North Carolina, RxMedic provides leading edge dispensing technology to pharmacies. Each RxMedic product is strategically engineered to increase productivity and enhance patient safety while providing pharmacy staff more time for customer service. Offering automation from a tabletop unit up to a fully automated 256 cell dispensing robot, RxMedic has an affordable solution for every pharmacy.

Product Overview

The RM200 from RxMedic is the newest product in the full line of pharmacy automation solutions. Automate your top 200 medications with the ease of auto calibrating cell technology. RM200 gives you greater accuracy and efficiency, so you can give your patients greater safety and service. Filling up to two prescriptions a minute, RM200 brings speed and accuracy while automating up to 65% of your most common oral solids.

- 17.4 Sq-ft Footprint (2.4' W x 7.25' L x 6.9' H)

■ **Cell Count and Capacity**
- 176 Standard Cell
- 24 Super Cells
- Standard Cell Volume: 550cc
- Super Cell Volume: 1350cc

■ **Electrical**
- Dedicated 20 amp 110v service with NEMA L5-20R receptacle.

Testimonials

"Automation, such as the RxMedic ADS, allows the pharmacist to do what they've really been trained to do, which is to be engaged in patient care management. You don't really have to go to school to put pills in the bottle. You go to school to know exactly what the pills in the bottle are going to do to achieve a health outcome."

— Kevin B. Sneed, Pharm. D., Senior Associate Vice President, University of South Florida College of Pharmacy

"I can see from the numbers how I'm getting my investment covered, but just as important, I can also see how we have more time for critical clinical activities like MTM and our med sync adherence program. I knew there'd be these soft benefits beforehand, but they've really exceeded my expectations."

— Dave Lutz, R.Ph., Rhoads Pharmacy & Gift Shop, Hummelstown, PA

Additional Product Lines

Offering automation from a tabletop unit up to a fully automated 256 cell dispensing robot, RxMedic has an affordable solution for every pharmacy.

■ **Automated Counting System (ACS):** Scalable counting solution from 24 to 96 cells that simultaneously counts multiple prescriptions.

■ **Automated Dispensing System (RM64):** Compact 64 cell robot with the fastest dispensing rate on the market at five prescriptions a minute.

■ **Automated Dispensing System (ADS):** Fully automated 256 cell robot with completed capped prescriptions collected in a 200+ finished script collation area.

■ **Automated Dispensing System (RM200):** Automate up to 65% of your daily oral solid volume, filling up to two prescriptions a minute.

■ **Affordable Will Call Solution (ARS):** Light will call bags on demand for efficient prescription retrieval.

■ **Visual Counting System (eyecon®):** RxMedic proudly sells the eyecon® tabletop counter that counts pills at a rate of 200ms.
