Company Background

Established in 2010, Suncrest Solutions is the brainchild of founder Joel Flaker, a former pharmacy software professional with over a decade's experience and a degree in computer science and software development. He foresaw an opportunity to transform and simplify will-call systems within pharmacies, and thus, Suncrest Solutions was born.

Over the past decade, Suncrest has made significant strides in the industry with its automated will-call system and hang-up bag systems. Both solutions are recognized for their simplicity, seamless integration, and straightforward installation. They've not only gained momentum but also garnered respect, effectively simplifying complex will-call processes in the industry.

Eighteen months ago, Suncrest took a major leap forward by acquiring the Suncrest Lighted Bag solution, an innovation that perfectly complements our HangRx system. This strategic move revolutionized the will-call system, bringing Flaker's original vision to fruition. Today, ARS is drawing significant attention, creating a buzz at every show it attends.

The ARS system is more than just an automated will-call solution. It's a testament to our dedication to making pharmacy processes simpler and more affordable. With its easy-to-use interface and cost-effective structure, Suncrest is indeed creating waves, reinforcing our commitment to revolutionizing pharmacy operations.

Join the revolution with Suncrest Solutions, where we simplify the will-call processes, one pharmacy at a time.

Product Overview

Introducing RxMedic (ARS), a state-of-the-art will-call solution revolutionizing pharmacy operation. This light guided will-call system streamlines workflows, minimizes errors, and elevates will-call management and tracking.

Hang-Up Bags ARS utilizes transparent pharmacy hang-up bags made of robust 8-mil plastic, allowing for effortless visual identification of contents. These bags form the backbone of the ARS, converting your will-call setup into a fully automated system. The bags' handles are integrated with a light-up feature, powered by two watch-sized batteries with a lifespan of 18-24 months, ensuring easy identification and retrieval.

Automated Retrieval and Light Guided Will-Call ARS is adept at instantly locating prescriptions, thanks to the light guided will-call feature. This system not only effectively manages prescriptions but also automates return-to-stock processes, delivering real-time updates. This functionality is amplified by the seamless integration with your existing pharmacy management system, leading to accurate, efficient, and reliable retrieval, illuminated by the light-guided will-call system.

Simple Solution ARS is not just a product; it's a comprehensive bin management solution and a strategic partner for your pharmacy. Guided by simplicity, ARS enables you to scan prescriptions, hang them in light-up bags, and walk away. This system revolutionizes will-call management, making it effortless and efficient.

Embrace the future of pharmacy operations with ARS, the intuitive, user-friendly light guided will-call solution designed with your pharmacy's needs at heart.

Testimonial

"RxMedic's ARS provides peace of mind regarding patient safety not found in other will-call systems. It's helped us utilize the tools in our pharmacy management system better."

— Eric Russo, Director of Clinical Services at Hobbs Pharmacy, FL
