Company Background

Founded in 1948, Follett LLC is a leading manufacturer of high-performance, medical-grade refrigerators and freezers. Follett's commitment to superior design and construction, as well as outstanding customer service, has resulted in our unparalleled reputation for excellence with customers around the world.

Follett occupies over 200,000 square feet of manufacturing and office space in the Lehigh Valley, Pennsylvania, with a manufacturing facility in Gdansk, Poland to support global customer growth.

Product Overview

Follett medical-grade refrigerators and freezers maintain precise and consistent temperatures for your valuable medications and vaccines. Powerful forced air refrigeration enables quick recovery after door openings, ensuring medications are stored at specified temperatures and reducing the risk of lost product.

■ Follett upright refrigerators and freezers feature a powerful top-mounted refrigeration module and innovative back plenum air distribution system for superior temperature consistency.

- Custom-designed, modular refrigeration system with microprocessor controller provides a $\pm 1^{\circ}\text{C}$ temperature consistency throughout the storage cabinet, ensuring all product is stored within the proper range.
- Industry-exclusive plenum air distribution delivers cold air at six different levels for top-to-bottom temperature uniformity, allowing full utilization of the storage space.

■ Full stainless steel cabinet, high-quality components, and an intuitive control panel designed with the user in mind.

- 7" full-color LCD capacitive touchscreen user interface for easy access to settings and data management.
- Dished stainless floor contains spills for easy clean-up.
- Heavy-duty dual casters roll easily and lock securely.

■ Heavy-duty doors provide ease-of-use and important energy savings.

- Full view locking glass doors with ADA-compliant full length handle standard on refrigerators; solid stainless steel doors are available as an option.
- Energy-efficient, dual-pane glass with low-E coating reduces energy loss by 30-50%.
- Solid stainless steel doors on upright freezers feature 2.6" thick insulation.
- Self-closing door locks open at 90 degrees to allow easy product loading.

■ Choice of superior storage options.

- Industry-exclusive "floating" basket system on pharmacy models.
- Six full extension, epoxy-coated "floating" baskets move with a gentle push or pull.
 - Shielded stainless steel bearings and stainless steel S-track design eliminate binding and uneven wear found with loose bearing systems.
 - Baskets and slide assemblies lift out without tools for full cleaning access.
- Four heavy-duty, epoxy-coated shelves, adjustable in $\frac{1}{2}$ " (1 cm) increments are standard on laboratory models.

■ High-performance countertop refrigerators and freezers offer superior temperature performance in space-saving configurations.

- One and two cu ft models fit on standard 24" deep counters.
- Forced-air cooling provides cabinet-wide temperature consistency and quick recovery after door openings.
- External digital temperature display in user-selectable F or C with integral high/low alarming and display sleep mode.
- Keyless entry via keypad and electronic lock option.

■ Powerful undercounter refrigerators and freezers are designed for use below standard and lower ADA-compatible counters.

- Heavy-duty forced air cooling for quick recovery after door openings.
- External digital temperature display in user-selectable F or C with integral high/low alarming and display sleep mode.
- Keyless entry via keypad and electronic lock option.
