Company Background

RXinsider is a multi-media and software development company providing innovative solutions to a variety of healthcare disciplines and colleges. Our goal is to provide innovative and practical technologies that support healthcare practitioners throughout their continuum of practice. Our six Business Units include: Academic Software, Job/Career Solutions, Continuing Education Solutions, B2B Solutions, Credential ePortfolios, and B2C Solutions.

Product Overview

RXinsider's *Pharmacy Technician Training & Orientation* is a no-nonsense training program for busy pharmacy managers interested in developing new-hires into productive staff within a short amount of time. The program focuses on basic skills and understanding while minimizing training burdens on the existing staff. Our *Pharmacy Technician Training & Orientation* is the perfect starting point for cross-training front store personnel and training new pharmacy staff.
