Company Background

iA is a leading provider of prescription fulfillment and automation solutions that optimize the entire Rx lifecycle. With over 25 years of experience in pharmacy innovation and partnership, iA's mission has never wavered from streamlining operational processes through advancing technology. iA continues to drive pharmacy industry innovations informed by a commitment to improving the safety and efficiency of fulfillment.

Product Overview

iA's prescription fulfillment solutions are powered by NEXiA, its proprietary software for pharmacy. NEXiA represents the “nexus” of people, process, and technology, working to maintain a high level of safety, while streamlining and optimizing the fulfillment process end-to-end — from acceptance at the pharmacy through dispensing to inventory management and delivery to the patient via mail or back to the pharmacy for patient pick up.

Features & Options

■ Queue-Based Workflow and Dynamic Prioritization

Through the use of barcoding technology, NEXiA's queue-based workflow relieves pharmacists of the burden of manual prescription fulfillment-related tasks and manages the dynamic routing and prioritization of prescriptions to meet patient promise dates and times.

■ Software Agnostic With 700-Plus Configuration Settings

NEXiA software can seamlessly integrate with third-party hardware and systems with flexible configuration for different pharmacy shapes and sizes.

■ Sophisticated Warehouse Management Systems

NEXiA helps give pharmacists oversight across every stage of the fulfillment process to improve workflows, save time, and help reduce fulfillment burdens for pharmacists, and help lower the cost to fill.
