Liberty
SOFTWARE

Company Background

For over 20 years, Liberty Software has been a dedicated and reliable partner to community pharmacies across the United States. Our roots as an independent computer service company have shaped our commitment to providing essential services to community pharmacies, a commitment we've never forgotten. Today, we offer software and services empowering pharmacies to overcome their challenges. Our flagship platform, RXQ, is not just a tool: it's a partner to pharmacists across America, making their jobs easier and enabling them to serve their patients better.

At Liberty Software, we don't just work hard to ensure customer satisfaction; we strive to make our customers feel like part of our family. Our team, experienced in pharmacy and technology, is knowledgeable, friendly, and approachable, always ready to help.

Product Overview

What sets us apart? It's not just our cutting-edge technology, or comprehensive array of features, it's our commitment to an unparalleled user experience and robust security measures. Prescriptions are filled swiftly and accurately, with many pharmacists attesting to RXQ's simplicity as the easiest system they've ever used. We protect your patients' data with the highest level of encryption, ensuring their privacy and peace of mind.

Consider This

How long does it typically take to train new employees on your current pharmacy software? Our clients utilizing Liberty have discovered that new hires can often start filling prescriptions immediately, requiring minimal to no training. Transitioning to the RXQ platform is seamless, with our team providing comprehensive support and training. It's that straightforward. A well-crafted pharmacy system should enhance both productivity and employee satisfaction. And when assistance is needed, support is just a phone call or mouse click away.

Testimonials

"Liberty is a very good software, It's easy to operate. Previously we were using a different software and I did see a drastic difference with our reports, especially, it's very easy for us to do proper billing in that way."
— Syed H., Lead Technician, Campbell Pharmacy

"It's like one click, one tap away, to get to a feature. Of all the different pharmacy software's I've worked with. I felt like it's the cleanest user interface."
— Jake L., Technician, ReNue Rx Pharmacy

"The system is user-friendly and because every pharmacy is different, they will customize it to your needs."
— Judy H., PharmD, All-Care Pharmacy

"My favorite part of the software is the DIR feature and being able to take a look at that. We can compare our distributor rebate versus what kind of DIR Fee we're paying on it. So that's helped us save money."
— Jett J., PharmD, The Medicine Shoppe
