D2 SOLUTIONS

Company Background

D2 Solutions advances patient access via a unique combination of strategic consulting, tactical execution, and SaaS based technologies. D2 works with our client-partners to drive revenue, enhance operating margin, and decrease exposure to regulatory risk.

Our client base includes established pharma and biopharma companies, emerging and venture backed startups, leading specialty pharmacies, hospitals, HUBs, and others. This diversity of customers provides D2 a unique advantage as we develop leading edge solutions that drive patient access, accelerating therapy start and ensure medication persistence.

D2 Two Divisions — Consulting and Technology

■ Consulting

- Pharmaceutical Manufacturer Consulting
- Specialty Pharmacy Consulting

■ Technology

- ComplySuite
- UltraTouch Engage
- UltraTouch Verify

Product Overview

■ **ComplySuite** is an automated licensure and accreditation system built by D2. Over the last 11 years, D2 has been collaborating with the major accreditation bodies and regulatory agencies to uncover ways to streamline the process. With keen insight from our clients and our pharmacist consultants, we have developed ComplySuite, an automated, web-based compliance solution.

■ **UltraTouch Verify™**, our automated prior authorization platform, cuts the average authorization and verification time to less than 24 hours. UltraTouch Verify integrates with your existing workflow and gives both payers and prescribers a single, secure platform to exchange critical information, speeding response times, and paving the way for a more efficient patient onboarding experience.

■ **UltraTouch Engage™** is developed to bring manufacturers, providers, pharmacies, and patients closer together, enhancing product access and resulting in better patient care. From the moment a specialty patient is identified, from education to first fill and throughout the patient's entire medication journey, UltraTouch Engage delivers measurable results and actionable data that drive value at every step.
