Company Background

Digital Business Solutions, Inc. is committed to delivering a leading edge cloud-based infrastructure in pharmacy business. We are dedicated to using state-of-the-art technology so your retail or outpatient pharmacy can quickly and efficiently fill their prescriptions. DigitalRX Pharmacy software offers a cost-effective, easy-to-use Windows-based solution providing a one-stop comprehensive application to manage your pharmacy workflow.

Our goal is to inform and provide relevant pharmacy system information for those that are in the market for a new pharmacy management system or looking to upgrade their current system. We work with multiple technology providers and industry experts to complete the puzzle for your organization's specific needs.

During the process of integrating and updating your systems, our team will give your pharmacy the world-class care that it deserves. After enrollment, your pharmacy will be allocated a team of professionals who will work with you to learn all the facets of your operation. We will also provide in depth training for you and your team on user-friendly systems and will be there when everything goes live.

Product Overview

DigitalRX is driven to improve the success of your pharmacy which is why our product makes filling a prescriptions an enjoyable experience. It's easy-to-use and built-in feature make it the most comprehensive pharmacy management solutions on the market. You should use DigitalRX due to its accurate, fast, reliable, high-volume system. There is no need to have a server in your store because all your pharmacy data is stored on our high-performing secured cloud-based servers. For peace of mind, we backup your pharmacy data regularly to prevent loss of data. As a convenience we have pre-loaded commercial plans, a nationwide physician directory, and an extensive drug clinical database for your use. It is our mission to provide a quality product to our DigitalRX users and we are confident our solutions will optimize your pharmacy workflow experience.

Features & Options

- **Customer Consultant:** We are committed to assist with your pharmacy needs. Our professional customer support services are available to ensure your pharmacy's success.
- **AutoRX:** DigitalRX has implemented a game changer. With our high-tech automations we have streamlined the prescription filling process. Our AutoRX feature will automatically adjudicate prescriptions due for refill nightly including prescriptions flagged for Future Bill. It's time to focus on new RX's and let DigitalRX take care of the rest.
- **RX Compliance:** Synchronize the patient medication for one delivery date per month, using our patient MedSync tool. Now you can stay ahead in your star rating by viewing your pharmacy adherence percentages report in DigitalRX.
- **Payment Lookup and Verification:** You have the ability to verify reimbursement payment before adjudication with one click.
- **Advance Filters:** Throughout DigitalRX you'll find several advance search and custom filter options to identify specific information.
- **Customized Reporting:** Design your desired report or utilize any of our several dispensing and/or financial reports.
- **SMS Notification:** Send a text message when the prescription is ready for pickup.
- **DBS Mobile Delivery:** Capture the patient signature and payment instantly at point of delivery using our Mobile Delivery App on iPhone, iPad, and Android devices.
- **Prior Authorization:** Find the proper PA form automatically with no data entry required.
- **Remote Printing:** Our cloud-technology allows you to access your pharmacy database from anywhere. In addition, you can print a prescription label from a remote location directly to the pharmacy.
- **EDI Bundle:** DigitalRX supports several electronic methods to provide a more efficient process for vital information such as wholesaler price updates, inventory, reconciliation, worker's compensation billing, and many more.
- **CompoundingRX:** Create a compound batch with complex formulas and guarantee the highest reimbursement for pricing formulas.
- **DigitalPOS:** An integrated point-of-sale solution to manage your pharmacy sales and inventory.
- **Nursing Home Module:** Manage your NH patient refills for the LTC facilities. Generate MAR, physician orders, and centrally stored destruction documents instantly.
- **Accounts Receivable:** A built-in patient charge account module to create professional invoice statements for customer review.
