Company Background

Medicine-On-Time, A CSS Health Company, improves population health through customizable medication management for patients and intuitive software for pharmacies. CSS Health's unique combination of technology, personal engagement, and proven processes helps health plans, pharmacies, and partners to simplify complex medication regimens, manage costs, and improve lives.

Product Overview

Medicine-On-Time serves a wide variety of pharmacy and facility patients with integrated software, superior packaging, robust workstations, and automation integrations that enable pharmacies to expand business and improve patient lives.

Medicine-On-Time solutions simplify and synchronize prescriptions through detachable dose cups in color-coded blister packs containing the exact medications each patient needs, individually marked with name, contents, and dosage time.

Easy-to-read labels including patient image and easy-to-follow color-coded card times ensure proper patient care, charting forms provided within the software as well as communication between pharmacy, prescriber, and patient ensure better adherence.

MOT Software

MOTNext is the next generation of patient management software from Medicine-On-Time. This powerful software helps pharmacists and technicians serve more patients through improved workflows, additional features, and new medication compliance blister cards.

MOTNext guide technicians through the pharmacy workflow by providing simple prompts generated by the workflow calendar, which prioritizes packaging based on patient cycle fill dates. The workflow calendar identifies problem prescriptions and patients who may require additional refills.

MOTNext is based on the framework of the original Medicine-On-Time software with an updated user interface and added functionalities such as:

- Charting forms (MAR, MSR, MOR, TSR, facility/physician order sheet).
- Patient/facility/provider management tools.
- Individual and facility level visibility, for managing residential facility patients.
- Template sizing for medications with our "smart packaging" system, saving space and packaging.
- Remote and on-site support and comprehensive training for the system.
