### Company Background

Parasol Medical is proud to celebrate a decade of being at the forefront of healthcare innovation, delivering innovative medical devices and pharmacy products that improve patient outcomes and streamline clinical workflows. Our commitment to improving patient outcomes, customer satisfaction, and market agility remains stronger than ever. We understand that transitioning to the new USP <797> standard and complying with increased testing and documentation requirements can be challenging. At Parasol, we provide our customers with the necessary resources and guidance to ensure compliance every step of the way. With our extensive industry experience and unwavering commitment to customer success, you can trust Parasol Medical to help you navigate the changing landscape of healthcare and pharmacy regulations and deliver exceptional quality.

### Product Overview

**■ Updated directions for use, log sheets, and support documents to help your facility comply with the increased documentation requirements:**

We understand that keeping up with regulatory standards can be a challenge. In response, we have developed new user-friendly directions for use and log sheets to help customers comply with the updated USP <797> standard. By providing clear, concise guidance and covering all essential information required by the standard, our new log sheets and directions for use make compliance easier and more accessible for customers.

Each document is tailored to the specific section of the USP <797> standard that applies and has been carefully crafted to cover all the essential information required by the standard. We believe that the new documents will be a valuable asset in streamlining compliance and empowering customers to test with confidence.

### ■ Variety of Convenient Preassembled Test Kits

We offer a variety of preassembled test kit options that are ready to use, making the testing process easier and more efficient for busy pharmacy teams. Our à la carte test kits are designed to supplement our preassembled kits and provide a more tailored testing solution that closely mirrors daily compounding practices in your facility. Need a custom test kit, contact our team to design a test using the à la carte kits or to discuss a unique preassembled test kit for your facility.

### ■ Dedicated Team to Help With Your Questions

Our experienced team is available to provide guidance on the new regulations and help pharmacies navigate the changes. We are committed to providing the support our customers need to maintain compliance and work through challenges during the transition.

### Key Product Features

- Best in market log sheets, directions for use, and support materials.
- Variety of preassembled kit options.
- Comparable product configurations to most competitor's kits.
- Competitive pricing.
- Superior, non-lint producing packaging.
