## Company Background

Helmer Scientific, now part of Trane Technologies Life Science Solutions, is a U.S.-based manufacturer and worldwide distributor of medical-grade cold storage and laboratory processing equipment. We have over 45 years of experience in providing high-quality temperature-controlled environments, with our products being used in over 125 countries. Precise temperature performance and control are essential to the successful storage of pharmaceuticals, and Helmer cold storage products are designed and developed with these considerations.

## Product Overview

### ■ GX Solutions — Engineered to Perform, Engineered to Last

GX Solutions refrigerators and freezers are designed and tested to deliver world-class temperature performance. Helmer customers have come to trust from the leading manufacturer of pharmacy cold storage equipment.

### ■ Reliability

GX Solutions refrigerators and freezers are manufactured in an ISO 13485 certified, FDA registered facility. They have undergone accelerated life testing to ensure they provide reliable performance and protection for the most sensitive pharmaceutical applications.

Accelerated Life Testing (ALT) is incorporated into the Helmer design process to ensure reliability:

- Identifies and addresses possible failure modes prior to equipment release for general use.
- Exposes units to very high levels of stress to challenge the system down to the subassembly and component levels.
- Ensures the unit's design can withstand the rigors of daily use through a 10-year life.

### ■ Performance

Superior performance ensures that products are safely stored at the right temperature. GX Solutions refrigerators and freezers offer:

- Tight temperature uniformity and stability.
- Fast temperature recovery after door openings.
- Configurable to meet most application requirements.
- Standard NSF/ANSI 456 Vaccine Storage Certification.
- Available in 5 cu ft to 58 cu ft footprints.

### ■ Efficiency & Sustainability

GX Solutions refrigerators and freezers support sustainability initiatives without sacrificing performance.

- ENERGY STAR® certified.
- Utilize low-GWP natural hydrocarbon refrigerants with zero ozone depleting potential.
- Meet many energy standards including the EPA SNAP program.
