# Quality and Safety with HES' Unguator EMP and ExactDose Dispensers

The Unguator EMP (Electronic Mortar and Pestle) will allow you to introduce compounding into your fast paced/high volume pharmacy in a safe, unobtrusive, and efficient manner while increasing store profits. The ExactDose dispenser will allow you to dispense an accurate metered dose of 0.5ml with ease from the Unguator jars.

## Company Background

Health Engineering Systems is an innovative technology company that specializes in pharmacy software and compounding equipment. Our primary focus is to offer products that increase efficiency and quality control within the compounding pharmacy. These products include the Unguator™ product line, the nation's leading pharmacy software suite, and top-of-the line tool for metered dosing: the ExactDose™.

## Product Overview

Introducing compounding as a service into your fast-paced retail pharmacy has never been easier! The Unguator™ EMP™ is designed to eliminate the hassles of traditional topical compounding methods and provide a quick and safe method of offering this service to your patients. The process is simple: weigh your ingredients into the Unguator™ Jar, mount the jar to the Unguator™ EMP™, and start the mix. The Unguator™ will do the rest!

The automation of the Unguator™ e/s, 2100, and Q models will allow you to step away from the compounding process and manage your pharmacy. When the machine is finished mixing, you can come back to it at your convenience, remove the jar, and dispense medication to your patient from the same jar!

*Note: Dispensing from the Unguator™ Jars minimizes cross contamination due to the push-up bottom feature which allows you to distribute the topical preparation without ever touching the product!*

Overall, the Unguator™ EMP™ and its accessory line will streamline the topical compounding process in your pharmacy and allow you to add yet another service for your patients.

## Features & Options

The Unguator™ product family includes several models, each offering quick and consistent preparations while maintaining quality and minimizing contamination. Our most popular model, the Unguator e/s, offers mixing up to 500ml and automatic jar oscillation. Our newest model, the Unguator Q takes it to the next level with automatic scaling from one jar size to another. Need to mix larger quantities? Mix up to

1000ml with the Unguator™ 2100. No matter how much or how little you compound, we've got a machine that will work for you. Contact us to find your perfect Unguator™.

## Additional Product Lines

Aside from the Unguator™ product family, HES offers a handful of other products that help make your pharmacy more efficient, effective, and profitable.

### ■ Pharmacy Software

Health Engineering Systems, along with its sister company, RS Software, is the creator behind the nation's leading pharmacy software suite: CompoundAssist and ScriptAssist. Concentrate on your profession, and trust ScriptAssist to take care of your business, from prescription entry and refill through reimbursement. With CompoundAssist (included), you can profit from your compounding pharmacy practice. This stellar software suite will help your pharmacy simplify, organize, and increase profitability.

### ■ Key Software Features Include:

- Custom Queue Designer and Refill Reminders
- Tabbed Interface
- Search by Formula/Log Name in CompoundAssist
- Request Compounds from the Queue Workflow
- Assign Multiple Scanned Documents to Formulas/Log/Chemicals
- Signature Pad Ready for Pharmacy Verification of Compound

### ■ Metered Dosing

By popular demand, our 0.5ml dose ExactDose™ is back! With an improved design and consistent quality, the ExactDose™ allows you to dispense directly from the Unguator™ Jar. Simple to use, the ExactDose™ takes just three steps: push up the plunger, turn the handle, and push up again for precise dispensing! Call us for a free sample today!

## Key Business Partners

HES authorized distribution partners are: Fagron, Freedom Pharmaceuticals, Letco Medical, Medisca, PCCA, and Total Pharmacy Supply.

## Trade Shows/ Meetings Attended

HES actively and consistently attends national, local, and state shows and conferences. Look for our booth this year at NCPA, IACP Compounding on Capitol Hill, APhA, ACA Mid-Year Meeting, and many more!
