## Company Background

RxSafe began operations in 2008. Many of the principal employees have been innovating together since the early 90's at such companies as Pyxis, Omnicell, and DDN where they have extensively contributed to the advancement of automation in the pharmacy industry. RxSafe's founder and CEO, William Holmes, has authored over 60 U.S. patents.

## Product Overview

Join the other hospitals, clinics, military and institutional pharmacies, independents, and chains that have selected RxSafe automation in the quest for a better pharmacy.

Technology sets our automated strip packager apart. The RxASP line includes four models offering up to 1,000 smart cassettes that take oral solid packaging to a whole new level. Our easy-to-use universal cassette means there are no more trays or remote filling stations.

Our RxSafe 1800 is the leader in automated, high-density robotic storage and retrieval of stock bottles. It represents an evolutionary leap in pharmacy automation technology because it goes beyond drawer-based systems. Unlike vial filling robots that hold a small percentage of your formulary, a three-tower RxSafe system can hold virtually all of your oral solid stock bottles.

When you're busy, the RxSafe 1800 system really shines. Users report that a single operator can routinely fill at an effective rate of up to 120 scripts per-hour.

The RxSafe 1800 safely and securely stores your narcotics. And, if your space is tight, or there's better use for the space, RxSafe is the solution. In a three-tower system up to 5,400 stock bottle containers fit in only 40 square feet of space.

## Features & Options

### ■ RxASP Strip Packaging Systems

The RxASP line breaks all the barriers of past strip packagers. Designed with the most versatile "hi-fidelity" pouch printing and the easiest to open pouches, it has the highest speed in the industry and the lowest operating cost. Plus, our consumables cost is the lowest in the industry. Why? Automatically and dynamically, the RxASP creates a

single or multi-med pouch that exactly fits the contents — saving material and time. This can mean one pouch per med administration time. No machine configuration required.

What really stands out? This is the only strip packager with built-in vision inspection. Designed to be modular and scalable, the RxASP line has the smallest footprint of any strip packager on the market.

Our entry-level strip packager, the RxASP 20™, is the perfect choice for launching your medication adherence program. It's semi-automated with manual "Smart" cassette loading, producing up to 50 multi-med pouches per minute. Our variable length pouches means a single pouch per med administration time. No more patient confusion. No more trays or remote filling stations due to our "Smart" Universal cassette.

Designed to be modular and scalable, the RxASP line has the smallest footprint of any strip packager on the market.

Guide your patients to 100% adherence with RxEnsure™ — a complete package that provides an additional level of administrative assistance for your patients.

### ■ RxSafe 1800

Security. Accuracy. Efficiency. With only one technician and one pharmacist, virtually every pharmacy, every day can fill all prescriptions without extra filling staff. And, with one open bottle at a time, there's less chance for error, no wasted inventory, no narcotics theft. In fact, the RxSafe 1800™ is so secure it's been approved by the U.S. Department of Defense for C2 narcotics storage.

With the RxSafe 1800, inventory is 100% accurate because it stores stock bottles behind locked doors and forces workflow at one station without the added expense of other software or hardware.

Remote Stock Management is another standard feature of the RxSafe 1800. All pharmacy inventory is managed by the system whether it's inside or outside the RxSafe. No more audits. No more overstocking or wasted inventory.

## Testimonial

*"Our primary goals for making this automation investment were to increase our workflow and inventory management efficiency so we could free up staff to spend more time and attention on clinical services and other revenue generating activities."*

— Eric Black, R.Ph., Owner, Mt. Vernon Medicine Shoppe
