Company Background

Founded in 2002 Verity Solutions provides 340B software and services to hundreds of integrated healthcare systems, acute-care hospitals, pharmacies, and other 340B-eligible covered entities throughout the United States. Verity Solutions is located in Kirkland, WA with remote employees stationed all across the nation to best serve our widespread customer base.

Product Overview

Verity Solutions strives to provide best-in-class software, service, and support. Our account managers and support team work closely with covered entities to ensure maximized 340B savings and compliance. Verity offers a host of solution based product offerings designed to help you foster compliance, respond quickly to changing regulations, and maximize your savings. We partner with customers over the long-term to support on-going compliance and audit readiness. In addition, details about your orders and cost savings are always at your fingertips.

From our comprehensive split billing and contract pharmacy software to our audit and compliance services, we have complete 340B solutions that can be tailored to fit your covered entity's needs.

Testimonial

"Verity 340B™ is very user-friendly and easy-to-use. It is intuitive. Even with minimal instructions, users get an idea of how to use it. Moving around or finding data is a relatively easy task. Doing our jobs using the software doesn't require that we have to have a great degree of computer expertise. Verity 340B™ is fantastic. Our institution is not that technologically savvy or advanced. Verity Solutions is always one step ahead of us, and we are actually trying to catch up to be as savvy as they are!"
