Company Background

Integra is a leading provider of software solutions for the institutional pharmacy market. To date, over 600 pharmacies experience reduced costs, higher productivity and profits, and better customer service through use of Integra products.

Product Overview

■ **DocuTrack** is an industry-leading workflow and document management solution that provides an end-to-end paperless workflow to organize, store, route, retrieve, and track documents. Designed specifically for pharmacy, DocuTrack can be fully customized to your existing processes to help you:

- Locate Any Document in Seconds
- Eliminate Paper and Paper-Related Costs
- Expedite and Improve Audit Response
- Ensure Heightened Productivity
- Barcode and Instantly Fax Forms
- Save Time and Money

■ **DeliveryTrack** is a professional-grade delivery solution that fits seamlessly into your current processes and allows you to manage all aspects of pharmacy delivery. Available on the Android platform, DeliveryTrack is budget-friendly, easy-to-use, and provides:

- Electronic Signature Capture
- Item Verification
- Driver Tracking and Turn-by-Turn Directions
- Real-Time Proof of Delivery
- Barcode Scanning
- Integration with Third-Party Carriers

■ **Logix** is the industry's first true business automation tool. Integrated with DocuTrack, Logix can automate repetitive tasks and store business rules. Handling refill requests can be completely automated: from initial fax back, multiple refaxing attempts, and matching facility response with the original document – all with no staff intervention. Logix gives you the tools; you decide where to apply automation. Logix can:

- remember business rules and procedural requests from individual customers.
- handle time-consuming fax follow up on refills and clarifications.
- auto-populate commonly used forms and instantly fax them with one click.

Testimonial

"Integra is a great partner. They cater to our needs, and we get great products that help us provide better and quicker information to our patients, and reduce our costs."

— Jorge Garrigo, Leon Medical

Open Platform

Integra is dedicated to an open platform that allows 3rd-party applications to integrate fluidly, easing the transition of Integra software into your existing processes and providing robust functionality. Furthermore, tight integration between all Integra products ensures the highest levels of connectivity, customization, and operation.

Interfaces

We currently interface with over 20 pharmacy information systems including QS/1, FrameworkLTC, HBS, Rx30, RNA, ComputerRx, PK Compounding, and Prodigy. Interfaces to numerous EMR and forms providers offer additional customization.
