## Company Background

TCGRx is a leading supplier of pharmacy automation and pharmacy design services. Our solutions range from individual components to address specific issues, to complete pharmacy design. TCGRx has an experienced staff and we pride ourselves on delivering high-quality, reliable products that can be used, improved, and scaled for decades to come.

## Product Overview

### ■ HDStock™

HDStock™, high-density fixtures from TCGRx, create an organized and tailored storage system for your pharmacy. This pharmacy storage solution will free up space and reduce technician filling time while creating a clean and bright design for a professional setting. All of our fixtures are available with unique labeling and dividing features that make finding medications quick and easy. A wide array of available colors and styles allows you to customize not only the layout of your pharmacy, but also the look. Options for the HDStock include: carousels, high profile shelving, bulk shelving, and workstations.

## Additional Products

### ■ Beacon® Inventory Management

Beacon is unique — tracking total pill quantity, inventory on hand, and usage. Additionally, Beacon provides bottle-specific information, including quantity and expiration date tracking. Using our unique barcode scanning and light-guided pick and put process, Beacon can direct technicians to fill scripts following the priority of open bottle first, shortest expiration date second. Beacon can also manage your will-call with DeliverRx™, using the same barcode and light guided system.

### ■ ATP® 2

The ATP® 2 Automated Tablet Packager is the most versatile, industry-leading oral solid packager on the market. Engineered to provide improved performance, reliability, and flexibility, the ATP 2 is available in a wide variety of sizes and is expandable for future growth or business needs with 64 to 480 medication canisters. When combined with AutoSense™ smart canister technology and ½ tab canister dispensing, the ATP 2 has

a limitless formulary capacity. Equipped with a dual tray system, you can now continuously run your ATP 2 without interruptions, making strip packaging and adherence packaging practical for any pharmacy. The ATP 2 facilitates both unit dose and multi-med packaging with multiple sizes, and can include color indicators to signify proper pass time and various images and logos to give you maximum flexibility. The ATP 2 integrates with the comprehensive suite of pharmacy solutions offered by TCGRx, including a fully automated image verification system, the InspectRx, automated collation system, the Collect™, BullsEye® automatic tablet splitter, and noncanistered filling with our patented SmartTrayRx™ system.

### ■ InspectRx™/Collector™

InspectRx gives pharmacies the confidence of knowing that their AdherePac™ pouches are accurate while increasing the throughput of the checking process. Pills are verified by identifying 12 physical characteristics and highlighting potential issues for pharmacists. Pharmacies can track erroneous pouches and missing meds back to the source with an archived database of the front and back image of each AdherePac scanned. Adding the Collector enables the rolling, cutting, and taping of each patient or medication strip, vastly improving the speed of preparation for delivery.

## Markets Served

- Retail — Independent
- Retail — Chain
- Long-Term Care
- Hospital — Inpatient
