Company Background

RxSafe began operations in 2008. Many of the principal employees have been innovating together since the early 90's at such companies as Pyxis, Omnicell, and DDN where they have extensively contributed to the advancement of automation in the pharmacy industry. RxSafe's founder and CEO, William Holmes has authored 50 U.S. patents.

Product Overview

Technology sets our automated strip packager, the RxASP 1000 apart—offering more than 1000 canisters, it takes oral solid packaging to a whole new level. Our easy-to-use universal canister means there are no more trays or remote filling stations since it can dispense any size pills including split tabs without calibration.

RxEnSure provides you with a complete package to guide your patients to 100% medication adherence. Finally there's an end-to-end solution. With a 97% patient retention rate after three years, it drives med consolidation, provides a customized patient calendar and is available for all pharmacy formats.

The RxSafe 1800 is the leader in automated, high-density robotic storage and retrieval of stock bottles. It represents an evolutionary leap in pharmacy automation technology because it goes beyond drawer-based systems. Unlike vial filling robots that hold a small percentage of your formulary, an RxSafe system can hold virtually all of your oral solid stock bottles including your compounds.

When you're busy, the RxSafe 1800 system really shines. A single operator can routinely fill at a rate of over 100 scripts per hour. If your space is tight, or there's better use for the space, RxSafe is the solution. In a 3-tower system up to 5,400 stock bottle containers fit in only 40 square feet of space. Join the other independents, chains, hospitals, clinics, military, and institutional pharmacies that have selected RxSafe in the quest for a better pharmacy.

Features & Options

■ RxASP 1000 for Adherence Packaging

The RxASP 1000 breaks all the barriers of past strip packagers. Designed with the most versatile "hi-fidelity" pouch printing and the easiest to open "tear anywhere" pouches, it has the highest speed and accuracy in the industry, plus the lowest operating cost.

What really stands out is the huge space savings. Engineered to have the smallest footprint of any strip packager on the market, the RxASP 1000 replaces 10 automatic strip packagers in 80% less space with only one set of inventory and one maintenance agreement.

Additionally, our product line includes the RxASP 20™ for entry-level packaging and retail adherence programs.

■ RxEnSure for Medication Adherence

Seven years in development, RxEnSure outperforms anything on the market. The software creates a personalized medication kit that includes a color-coded calendar and labels, plus a medication list that is delivered monthly to the patient and doctor. Expect to see statistically significant improvements in length of therapy and proportion of days covered, which provide additional pharmacy revenue.

■ RxSafe 1800 for Outpatient & Employee Pharmacy

Accuracy. Efficiency. Security. With only one technician and one pharmacist, virtually every pharmacy, every day, can fill all prescriptions without extra filling staff. With one open bottle at a time, there's less chance for error, no wasted inventory, and no narcotics theft. In fact, the RxSafe 1800 is so secure it's been approved by the U.S. Department of Defense for CII narcotics storage.

With the RxSafe 1800, inventory is 100% accurate because it stores stock bottles behind locked doors and forces workflow at one station without the added expense of other software or hardware. Remote Stock Management is another standard feature of the RxSafe 1800. All pharmacy inventory is managed by the system whether it's inside or outside the RxSafe. No more audits, overstocking or wasted inventory.

Testimonial

"We selected RxSafe for our strip packaging technology to take advantage of 'next generation' automation. We're enjoying the benefits of state-of-the-art integration, 'high fidelity' flexible pouch printing, lower labor and consumables cost, plus higher accuracy in a small footprint. Additionally, RxSafe has excellent customer service that supports our needs."

— Rick Rondinelli, RPh, President-CEO, In Touch Pharmaceuticals, Inc.
