TCGRx
PHARMACY WORKFLOW SOLUTIONS

Company Background

TCGRx is a leading supplier of pharmacy automation and pharmacy design services. Our solutions range from individual components to address specific issues, to complete pharmacy design. TCGRx has an experienced staff and we pride ourselves on delivering high-quality, reliable products that can be used, improved, and scaled, for decades to come.

Product Overview

■ Beacon® Inventory Management System

Beacon is a full inventory management system that supplements a pharmacy's current process. Beacon is unique — tracking total pill quantity, inventory on hand, and usage. Additionally, Beacon provides bottle-specific information, including quantity and expiration date tracking. Using our unique barcode scanning and light-guided pick and put process, Beacon can direct technicians to fill scripts following the priority of open bottle first, shortest expiration date second. Beacon manages your will-call with DeliverRx™ using the same barcode and light guided system.

Additional Products

■ HDStock™

HDStock™, high-density fixtures from TCGRx, creates an organized and tailored storage system for your pharmacy. This pharmacy storage solution will free up space and reduce technician filling time while creating a clean and bright design for a professional setting. All of our fixtures are available with unique labeling and dividing features that make finding medications quick and easy. A wide array of available colors and styles allows you to customize not only the layout of your pharmacy but also the look. Options for the HDStock include: a carousel large, carousel small, high profile, bulk shelving, speed shelving, and workstations. HDStock offers the ability to enhance your inventory by adding our Beacon IMS.

■ ATP® 2

Our latest Automated Tablet Packager, ATP® 2, is the most versatile, industry-leading oral solid packager on the market. Engineered to provide improved performance, reliability, and flexibility, the ATP 2 is available in a wide variety of sizes and is expandable for future growth or business needs with 64 to 480 medication canisters. When combined with AutoSense™ smart canister technology and ½ tab canister dispensing, the ATP 2 has a limitless formulary capacity. Equipped with a dual tray system, you can now continuously run your ATP 2 without interruptions, making strip packaging and adherence packaging practical for any pharmacy. The ATP 2 facilitates both unit dose and multi-med packaging with multiple sizes, and can include color indicators to signify proper pass time, and various images and logos to give you maximum flexibility. The ATP 2 integrates with the comprehensive suite of pharmacy solutions offered by TCGRx including a fully automated image verification system, the InspectRx, automated collation system, the Collector™, BullsEye® automatic pill splitting, and non-canistered filling in our patented SmartTrayRx™ system.

■ Spoolers and Winders

Once pouches are dispensed from your automated packaging device spoolers and winders are designed to help with the distribution of medications to carts, cabinets, boxes, and ultimately to the nurses and patients. TCGRx offers a comprehensive solution for managing the hundreds or thousands of packages dispensed by your automated packaging machine. Our unique tabletop and rolling stands can help manage the distribution and staging of your medications.
