## Company Background

Freedom Pharmaceuticals specializes in the custom wholesale distribution of premium compounding chemicals – active pharmaceutical ingredients (APIs), excipients, and pre-made bases – to independent compounding pharmacies throughout the United States. Founded in 2010, our goals have remained consistent: Supply your compounding pharmacy with the highest quality chemicals available and give your staff the personalized customer service you deserve. Built on the belief that customer service and quality chemicals are paramount, Freedom Pharmaceuticals is committed to meeting the ever-changing demands of independent compounding pharmacies and their patients.

## Product Overview

At Freedom our customers are the top priority, that is why we focus on continually expanding our product offering to help present solutions for your pharmacy.

## Our Most Recent Product Expansion Includes

### ■ Freedom PolyMatrix Powder

A state-of-the-art dry powder advantageous for compounding prescriptions for patients needing effective wound care.

### ■ Freedom Derma Serum

This light-weight, non-greasy fluid vehicle contains a complex of soothing humectants, antioxidants, and rich botanicals, ideal for dermatological preparations.

### ■ Freedom PEG Troche Base

Offers sublingual dosing and allows for maximum opportunity for absorption through the mucosal membranes.

### ■ Lipopen Anhydrous

A non-aqueous penetrating vehicle that is a convenient option when compounding with APIs that are poorly stable in water.

## Freedom Five Star Advantage

When you become a customer of Freedom Pharmaceuticals, you will immediately experience our Five Star Advantage.

- **Insurance/Third-Party Support, Guidance and Consulting:** Freedom Pharmaceuticals is a leader in the third-party training and consulting industry. CPCS, a division of Freedom, actively works with compounding pharmacies to ensure proper third-party billing techniques for compounded prescriptions.
- **A True Custom Supplier:** Your pharmacy provides customized preparations. Why can't your supplier do the same? At Freedom our product quantities are offered in multiple package size options.
- **No Membership Fees or Contractual Obligations:** Our name speaks for itself. Freedom: The Freedom to Choose. The Freedom to Compound. The Freedom You Deserve.
- **Competitive Pricing:** At Freedom we provide the highest quality pharmaceutical products available, delivered on a consistent and reliable basis, for a fair and reasonable price.
- **First-Class Customer Service:** Freedom customers have direct and immediate access to our team members who are ready to treat you with the professionalism and courtesy you deserve.

## Highest Quality Chemicals

At Freedom, we know that quality and consistency give our customers peace of mind, confidence, and a competitive advantage in their practice. That is why we are committed to providing the highest quality chemicals, excipients, and compounding bases available.

To ensure the integrity of our chemicals, every lot and batch is rigorously screened through our *Product Assurance Screening System (P.A.S.S.)*. Each lot of Freedom chemicals is first quarantined and subjected to a comprehensive, in-house identification analysis using various testing methods including FTIR and LOD. Once a positive identification has been confirmed, Freedom chemicals are sent to an independent analytical laboratory for further purity verification. Only chemical lots that perform optimally to this point will be scheduled for distribution. All chemical lots are evaluated for color, appearance, solubility, and application specific requirements. All Freedom products will be shipped with a lot specific Certificate of Analysis (CoA). The Material Safety Data Sheets (MSDS) are available upon request.

Freedom Pharmaceuticals is an FDA registered and inspected supplier. Freedom is also licensed by the DEA and maintains a cGMP compliant facility. We provide high-quality chemicals supplied only by FDA registered and inspected manufacturers that adhere to cGMP standards.
