Company Background

Freedom Pharmaceuticals specializes in the custom wholesale distribution of premium compounding chemicals – active pharmaceutical ingredients (APIs), excipients, and pre-made bases – to independent compounding pharmacies throughout the United States. Since founded in 2010, our goals have remained the same: Supply your compounding pharmacy with the highest quality chemicals available and give your staff the personalized customer service you deserve. Built on the belief that customer service and quality chemicals are paramount, Freedom Pharmaceuticals is committed to meeting the ever-changing demands of independent compounding pharmacies and their patients.

Product Overview

As a proven pharmaceutical resource, Freedom provides the highest quality pharmaceutical compounding chemicals available, delivered on a consistent and reliable basis, for a fair and reasonable price. We are continually expanding our product offering based on our customers' needs. At Freedom, we strive to be your support system, not just your supplier.

Freedom Bases

Freedom Pharmaceuticals provides high performance, ready-to-use compounding bases designed to help our clients provide the most state-of-the-art preparations on the market. These bases offer formulation flexibility with stable emulsions, pharmaceutically elegant appearances, and lab test functionality. Freedom also offers paraben, dye, gluten, fragrance, and petrolatum free base options to meet a vast variety of patient-specific needs. Base studies are available for select bases.

Product Assurance Screening System (P.A.S.S.)

- Every item is screened to meet the most current USP/NF/BP/EP/JP or other specifications.
- Each lot is quarantined and subjected to a comprehensive, in-house identification analysis using various testing methods including FTIR and LOD.

- Once the in-house analysis is approved, chemicals are sent to an independent analytical laboratory for further purity verification.
- Each chemical lot is evaluated for color, appearance, solubility, and application-specific requirements.
- Only chemical lots that perform optimally to this point will be scheduled for distribution.
- All Freedom products are shipped with a lot specific Certificate of Analysis (CoA), which are also available online and upon request.
- MSDS are available online and upon request.

Highest Quality Chemicals

Freedom is committed to providing the highest quality chemicals, excipients, and compounding bases available. At Freedom, we know that quality and consistency gives our customers peace of mind, confidence, and a competitive advantage in their practice. Freedom Pharmaceuticals is an FDA registered and inspected supplier. Freedom is also licensed by the DEA and maintains a cGMP compliant facility. We provide high-quality chemicals supplied only by FDA registered and inspected manufacturers that adhere to cGMP standards.

Comprehensive Pharmacy Support

Freedom Pharmacy Support Services (FPSS) offers comprehensive pharmacy compounding support, providing the knowledge, tools, and guidance needed to make compounding pharmacies prosper. FPSS services include: extensive online formula database, formulation research and development, application troubleshooting, physical chemistry information, clinical data research, chemical selection, equipment/device selection and application, calculation support, marketing support, formulation templates, and technical documents.

Insurance/Third-Party Guidance, Support, & Consulting

CPCSI Consulting, a division of Freedom Pharmaceuticals, consists of pharmacists and former PBM auditors. The team of CPCSI consultants are trained to educate, guide, and assist you and your pharmacy staff on how to properly bill third parties for compounded prescriptions. As a CPCSI member, our consultants will work with your pharmacy to ensure that proper audit response techniques are being utilized to significantly increase your chances of a successful audit result.
