Company Background

Unique and hard-to-find products are the lifeblood of our business. That includes manufactured solutions made by skilled technicians in our central Ohio facilities. By Design is where our manufacturing talent converts customer ideas into high-quality cabinet, metal, plastic, or print products made to their exact specifications. Best of all, we deliver those made-to-order solutions in five working days or less.

Product Overview

Our goal is firm — create functional products to improve everyday workflow — there are no limits to our design capabilities. We can turn virtually any idea into reality without outrageous upcharges or extended shipping schedules. Start with a no-obligation, no-cost digital proof for a cabinet, metal, plastic, or print project today!

Product Specifications

■ Cabinets by Design

Cabinets, shelving, and storage units for those who want to renovate existing spaces or outfit newly constructed areas with high-quality pieces made to their exact specifications.

The process starts with our *free* 3D Design Service, which provides a virtual layout of the targeted space paired with unique solutions that showcase specific design goals. We can create performance-rich products in multiple sizes, styles, and colors that make it easier than ever to achieve a customized brand.

Cabinets by Design offers the quickest, easiest, and most affordable way to maximize organization and efficiency. All units ship in five working days or less so customers can get the look they want without the wait.

■ Metals by Design and Plastics by Design

One-of-a-kind items manufactured to match individual customer requests. Modifications to stock products are also available. These allow customers to work more efficiently and produce better results.

From stainless steel storage containers, lock boxes, and utility trays to specially sized plastic lock boxes and dividers, we have the engineering and manufacturing capabilities to design and modify products or create affordable replacements that meet the everyday needs of our customers.

We can create and modify functional products using stainless steel, aluminum, acrylic, PETG, polycarbonate, polystyrene, HDPE, and PVC. There are no limits to our design capabilities.

Whether customers want to simplify USP compliance or better manage changing trends, we can design a solution and deliver it quickly.

■ Printing and Graphics by Design

From labels, magnets, and clings to banners, signs, and stamps, our print specialists can create solutions for any situation.

Prevent the confusion that results from the unknown by communicating a consistent message for all products across all departments. Choose the size, color, and style of your message and our print team will create it.

Kicking off a marketing campaign? We can help with an assortment of fun promotional materials. Our print experts can hot stamp a customer logo, message, or facility information on a variety of products. Our process ensures a professional finish with lasting results. We can print as few as 50 or as many as 1,000+ — and quick!

Ordering Information

It's easy for customers to begin their design journey. Complete a cabinets, metal, or plastics options request form, view our Print By Design options, or call our product specialists at (800) 848-1633 to discuss options.
