*Simplifying the Business of Healthcare*

## Company Background

Emdeon is a leading provider of revenue and payment cycle management and clinical information exchange solutions, connecting payers, providers and patients in the U.S. healthcare system. Emdeon's offerings integrate and automate key business and administrative functions of its payer and provider customers throughout the patient encounter. Through the use of Emdeon's comprehensive suite of solutions, which are designed to easily integrate with existing technology infrastructures, customers are able to improve efficiency, reduce costs, increase cash flow and more efficiently manage the complex revenue and payment cycle and clinical information exchange processes.

## Product Overview

**Clinical information exchange helping hospitals and health systems prepare for what's next.**

Clinical integration, care coordination, accountable care - the name may change but the goal is the same. Hospitals and health systems need to improve care, quality and patient safety while protecting the bottom line.

Emdeon understands your need for a greater level of connectivity with other healthcare providers, a solution capable of facilitating end-to-end clinical information exchange. Emdeon Clinical Exchange solutions are helping hospitals and health systems exchange information with the broader clinical community. We enable highly coordinated care that can drive ancillary services volume while simplifying the technology footprint.

Through Emdeon Clinical Exchange Medication History, hospitals can obtain pharmacy-sourced medication reconciliation information via their ePrescribing application, EHR, HIE or hospital-based web portal. This solution can help your clinical staff improve care coordination and fill potential gaps in medication history while potentially improving quality scores and reducing readmissions.

## Features & Benefits

### ■ Emdeon Clinical Exchange Medication History™ features include:

- Pharmacy sourced medication history
- Retains patient medication history when patient changes insurance carriers
- Access medication history 24x7 via your ePrescribing application, electronic health record or hospital web portal
- Information is delivered in the NCPDP 8.1 XML SCRIPT standard format
- Not dependent on patient ability to convey an accurate medication history and can include both cash prescriptions and those billed to insurance

### ■ Key Benefits

- Helps ambulatory providers and hospitals meet Meaningful Use Stage 2 and JCAHO requirements
- May improve quality scores and patient safety through more complete and accurate medication history
- Can fill critical gaps in patient medication history and help reduce readmissions
- Saves time and improves workflow; designed to deliver medication history in real-time within seconds
