Medi-Dose, Inc. EPS®

Company Background

Medi-Dose/EPS was founded in 1971 when Milton Braverman, a former pharmaceutical company Territory Manager, saw the need for inexpensive, manual unit dose packaging allowing a hospital to convert from traditional dispensing. He developed the Medi-Dose System to package, handle and dispense predetermined amounts of medication so they would be accessible for one regular dose.

Because of the continued success of the Medi-Dose System, Medi-Dose/EPS expanded its product line to include the TampAlerT System offering tamper-evident liquid packaging, without the need for heat tunnels and accessory sealing equipment, and a full line of supplies and disposable products designed specifically for the pharmacy and health care professional.

Product Overview

Our flagship software, MILT 3.0 by Medi-Dose, was designed to manage the printing of labels and packaging of unit dose medications. Using our Lid-Label Covers, LiquiDose, Mini-LiquiDose, Butterfly and Line Tracing Labels, you can easily and clearly identify and, if desired, bar code all your medications.

With MILT 3.0, we've greatly expanded the formatting options so you can design your labels any way you want. Bar Codes, Graphics, Special Fonts, Tall Man Lettering, Shapes, Logos and Symbols were all added to call attention to important dispensing information, helping minimize medication error.

Bar Coding has never been easier than it is in MILT 3.0. All common types of bar codes are supported — 1-Dimensional (1-D, linear) and 2-Dimensional (2-D) Multi-Part codes have been included (e.g. PDF417 and Data Matrix). You can construct your bar code your way. Incorporate whatever information

your BPOC or BCMA system requires — NDC, Lot Numbers, Beyond-Use Dating, Hospital Codes, Wholesaler Numbers.

In addition, MILT 3.0 supports our laser labels and our new line of direct thermal printer labels. Thermal versions of our Lid-Label Covers, LiquiDose, Mini-LiquiDose, Line Tracing and new Butterfly Syringe Labels are all supported. Now, you can print just what you need and design your labels any way you want.

Features & Benefits

- Edit Label Designs On-Screen
- Add Shapes and Images to Your Labels
- 1-D and 2-D Multi-Part Bar Codes
- Configurable to Your Workflow
- Electronic Log
- Easy to Network
- Works With All Medi-Dose and LiquiDose Labels

Additional Products / Models

Additional Software Products: MLT 2.6, Medi-Dose 2000, IV Profile/Label Software

Trade Shows / Meetings Attended

ASHP Midyear, ASHP Summer, Joint Forces Pharmacy Seminar, National Pharmacy Purchasing Association, various state & regional pharmacy conferences.
