Company Background

Pharmacy Ideas Computing, LLC is a software development and support company serving healthcare providers in North America since 2003. Our areas of expertise include software products for:

- Barcode verification and quality assurance for the medication restocking of anesthesia trays, RSI kits, code carts, medication kits/boxes
- Management and oversight of the monthly pharmacy unit stock inspections
- Pharmacy operational task planning, management, and reporting
- Pharmacy sterile and non-sterile compounding documentation and label printing
- Pharmacy staff competency scheduling, documenting, and reporting
- Medication expiration date tracking and reporting

Additional Product Lines

- RxVerify® – Safe medication restocking of pharmacy kits, carts, trays, and boxes using the medication barcode (Tracks the medication expiration dates and lot numbers as well)
- RxInspection® – Monthly unit stock inspection planning and oversight made easy

Key Product Benefits & Features

- Schedule and plan all daily, weekly, monthly, semi-annual, and annual operational tasks, including those required to be completed and documented for USP 797 compliance
- Low cost, web-based software service
- Email reminder alerts and compliance warnings generated automatically
- Define custom quality assurance checklists
- Link checklists to tasks
- Create custom task categories and assignments
- Task assignments can be defined by position type or specific employee
- View tasks by category and by assignments
- Robust reports, including employee workload comparison charts
- Easily monitor temperature compliance for medication refrigerators and freezers
- View temperature trending report charts
- Schedule and track all pharmacy staff competencies electronically
- Store all sterile and non-sterile compounding formulas
- Simplify documentation of compounds prepared through the use of predefined templates
- Print barcoded dose labels directly from the software to a label printer
- Users can add new one time tasks to improve team communication
- Prevents tasks, or checklist items, from being omitted in the pharmacy's daily workflow
