Company Background

Retail Management Solutions is the industry leader in point-of-sale technology for retail and outpatient pharmacy. We enable pharmacists to easily streamline their business operations while providing optimal, efficient patient and customer service.

RMS is the only supplier specializing strictly in POS technology for pharmacies. Having installed more POS systems in the independent and institutional pharmacy markets than any other company, RMS systems have become the industry standard.

Our full suite of retail applications provides a seamless front-to-back store automation platform that is hardware independent. Our systems are rock solid and have built-in safeguards. If one machine is down, even if it is the master server, other machines remain up and running. Security and compliance underlie all RMS systems and modules. Redundant storage, encrypted communications and certified payment mechanisms ensure protection and confidence.

You can count on us for prompt service in all 50 states, 24 hours a day, seven days a week. We are a privately held company, with employees throughout the country — pharmacy technology professionals with hundreds of years of combined experience.

Product Overview

Most hospitals capture a small portion of their inpatient discharge prescriptions. The consequences include reduced patient compliance, elevated risk of recurrence and readmission, and lost revenue and margins.

EvolutionPOS helps hospital pharmacies turn those risks into competitive advantages. EvolutionPOS places all the register functions in your hands. The portable, handheld terminal communicates immediately, wirelessly and securely with your POS server. A single device accomplishes the customer check-out, recordkeeping and inventory functions, including:

- Interface to your prescription system
- Tracking by barcode

- Electronic signature capture and audit trail
- Payment processing, including FSA eligibility
- Receipts provided via email or printed on the spot

This portable checkout capability can enable hospital pharmacies to fulfill more of their discharge prescriptions, by delivering right to the patient's room.

EvolutionPOS for Pharmacy is based upon the success of our highly successful POS offerings, Star-Plus, Star-Lite, Ultra-Lite and Star-Link for Enterprise. All are designed specifically to enable pharmacists and their staff members to operate efficiently and provide excellent patient service.
